

## **SECURE YOUR WIFI WITH PASSPOINT “HOTSPOT 2.0”**

The industry’s most secure way to currently connect over guest WiFi

### **WHAT IS HOTSPOT 2.0?**

Hotspot 2.0, also known as Passpoint, is a new standard that enables secure and automatic WiFi connection across compatible networks. With Hotspot 2.0, you can:

- Connect to an encrypted Passpoint SSID for enhanced WiFi security
- Have a unique encryption key for each user and device
- Access the internet seamlessly at future stays without logging in again
- Roam across other WorldVue properties that are configured with Passpoint

### **HOW TO GET STARTED WITH HOTSPOT 2.0?**

Getting started with Hotspot 2.0 is easy. All you need to do is download a login profile to your device once and you’re good to go. Here are the steps to follow:

- Connect to the WorldVue Guest WiFi network and open your browser
- Download and install the login profile to your device
- Connect to the WorldVue Passpoint WiFi network and enjoy

If you encounter any issues during the onboarding or login process, please refer to our support guide or contact our friendly staff for assistance.

### **WHY CHOOSE HOTSPOT 2.0?**

Hotspot 2.0 is the future of WiFi because it offers a faster, safer, and more convenient way to stay connected online. With Hotspot 2.0, you can:

- Save time and hassle by avoiding tedious login screens and passwords
- Protect your privacy and data by using encrypted WiFi connections
- Enjoy consistent and reliable WiFi performance across WorldVue properties
- Access exclusive offers and promotions from WorldVue partners
