

# WORLDVUE RADIUS GATEWAY

## Internet Gateway Designed for Larger Hotels and Venues

WorldVue's RG-901 enhances guest WiFi security while increasing guest satisfaction and simplifying bandwidth management.

### BENEFITS

#### Cost-Effective

Full-featured gateway that was designed to support the largest venues and full-service properties, packaged at the right price point.

#### Secure

Our Hotspot, Firewall, VLAN & VPN functionality provide additional security features compared with many gateway products on the market.

#### Reliable

Constructed using established hardware technologies tailored to meet the demands of all valued clients.

### FEATURES

- 2 x 10GB SFP+ connections
- 16 x 1GB Ethernet connections
- Redundant power supplies
- Efficiently handles 5000+ concurrent users without additional expenses
- Experience seamless and secure connectivity with Passpoint
- Fortified with industry-leading security measures

The RG-901 boasts approval from leading hotel brands and serves as an excellent solution for hospitality markets with a demand for accommodating up to 5000 concurrent users on their guest network.
