

CAST CONTENT DIRECTLY TO YOUR GUEST ROOM TELEVISIONS

Casting has never been easier. With little equipment required, World Cinema enables guests to cast any content from personal devices directly to guest room televisions.

WORLDVUE OFFERS DIFFERENT WAYS TO DISPLAY

Option 1: WorldVue will configure the TV's built-in channel lineup to make HDMI (Casting input) the next location after the last channel in the property's channel lineup. Ex: Configure the TV to go from Channel 40 to HDMI (casting) as the guest uses the up arrow on the remote

Option 2: WorldVue will configure a Reach or Pro:Centric server to insert the HDMI input as the last channel in the lineup.

Option 3: Enable an HDMI input in a SMARTBOX scrolling guide.

**No set-top-box is needed*

***Chromecast Dongle to be purchased and installed by WorldVue*

****WorldVue can apply overlay to the properties' current free-to-guest or programming system*
