

# WORLDVUE®

## WIFI CONTROL PANEL

### Cloud-Based Property Management Dashboard

*Live Network Health View and Reporting*

Take advantage of our Cloud-Based Dashboard to gain instant insights into your guest network. Effectively manage and monitor guest Internet access, including monitoring the number of connected guests and their online habits.

#### BENEFITS

- Monitor your network's present condition and usage
- Get a comprehensive overview of network and equipment status, support metrics, and usage data through a unified dashboard.
- Accessible from any device, anywhere, at any time.

#### FEATURE HIGHLIGHTS

- Administer tiered internet plans, bandwidth management, support requests, and related components.
- Get instant alerts and stay updated on equipment outages to ensure a proactive approach to resolution.
- Tailored to integrate with state-of-the-art technology, including various well-liked gateways and access points.

#### We make personalization easy!

*Easily customize a brand-specific captive portal through our Control Panel tool!*
