## WorldVue's Solutions

### Entertainment HUB™

WorldVue's Entertainment HUB™ aka "The HUB™" is a fully customizable in-room entertainment solution to meet and exceed your guests' and residents' desires. Upgrade your in-room experience without rewiring your property! The HUB includes a customized interface for your property and a full range of features to help you create and maintain the very best experience and keep them coming back time and time again.

### TV Programming

WorldVue and DISH Business have built a reliable 25-year partnership delivering entertainment technology to some of the world's largest hotels. With over 60 years of unparalleled knowledge and expertise in hotel entertainment, we take care of the technology so you can take care of your guests and residents. WorldVue offers a variety of free-to-guest (FTG) programming options that meet your brand standards and work with your existing infrastructure, plus proactive monitoring and 24/7/365 support, all with equipment that's space- and energy-efficient. We also offer casting options to meet guest and resident expectations for viewing their own content.

### Wired and Wireless Networks

With WorldVue's wired and wireless networks, there's no more need for business owners and general managers to worry about usage, security, or network issues- our team of experts can take care of that for you. We design a network to meet your needs, provide your business with the latest equipment, monitor and manage your network, and deliver 24/7/365 technical support. Your hotel Dashboard will help you manage and monitor your guest and resident Internet access in real time, including how many guests are on your network and how they're using it. WorldVue also offers options such as Centralized WiFi Authentication to make it easier for repeat visitors to access your network, yielding increased guest and resident satisfaction, decreased technical support calls, and improved guest feedback scores.

## Circuits & Low Voltage Cabling

WorldVue offers several options for data transmission, including wired, wireless, and VPNs. Our digital infrastructure solution has a 20+ year useful life with a wired infrastructure consisting of fiber and CAT6 cabling. From the early stages of design and planning to cable installation, whether it's an existing property or new construction, our team reviews your cabling specifics and electrical blueprints to design a custom wiring solution for you. Our mission is to deliver a network infrastructure that can easily scale for the higher bandwidth demands of guest and resident WiFi, VoIP, in-room entertainment, casting and streaming, and Over the Top (OTT) services.

## Cameras

WorldVue helps create a safer environment for guests and residents with cloud-based video surveillance solutions. Our solutions include video surveillance with remote access and the ability to quickly navigate between cameras across multiple locations to protect your brand reputation. You can choose new cameras from over 3,000 compatible options or use your existing analog cameras. You can also manage access to sensitive locations with access control integrations and use advanced analytics to monitor visitor traffic and receive automated alerts.

## Digital Signage

WorldVue's Digital Signage solution offers flexible content management to exceed guest and resident expectations, winning more even business and maximizing revenue per square foot. Our powerful, mobile-friendly content management tool enables you to change content on the fly, maximizing your ability to transform your space creatively and provide immersive, tailored experiences.

## Cellular Boosting

WorldVue's Cellular Boosting solution enhances your guest and resident experience and improves staff safety by ensuring there are no dead spots throughout your property. Using Nextivity's Cel-Fi products that optimize coverage in enterprise, small business, residential, and mobile settings, WorldVue delivers customized solutions that align with customer's in-building cellular connectivity needs and budget constraints.

## Voice

WorldVue offers VoIP-based telephone systems designed for today's hospitality voice communication needs. Our solutions can be used with SIP or analog phones for greater flexibility and cost-effectiveness and can be scaled for any size property. They also support the legal requirements such as 911 law, Kari's Law, and Ray Baum's Act, with unlimited DIDs (Direct Inward Dial numbers) to identify a specific room and not just the property.

## Access Controls

With WorldVue's Access Control solution, you can manage all your buildings from any connected device. Improve property appeal to increase resident retention and quickly fill new units, expand management opportunities by controlling doors across properties from any mobile device and managing vendor access, protect your investment and prevent damage with sensors and property environmental controls, and safeguard your property with automated access. Deliver a seamless digital experience for all your residents that enables them to open doors, control smart apartment features, pay rent, and submit work orders via one mobile app.

## ProSafe

ProSafe is the only room/area level-accurate, geo-location and evidence-gathering panic button platform currently available to hotels. With an interface that's simple and easy to understand, ProSafe helps deliver better guest experiences, decreasing operational costs and boosting brand reputation. All collected data is stored securely and protected by a PIN code, so only authorized staff members have access. ProSafe includes multiple activation methods including a panic button, location and incident reporting, push-to-talk, and real-time translation, enabling easy compliance without a significant investment in complex systems, hardware, or installations.

## Creative Services

CarrierWave Creative is our internal design and content creation agency, providing creative services including print, digital, photography/videography, UI/UX, and web design. If you have ideas, CarrierWave Creative can help bring them to life.

# WorldVue Serves Many Different Verticals

- **Hospitality** - WorldVue has been serving the hospitality industry since 1974. We work with many different brands, and are an approved provider for Best Western, Choice Hotels, Hilton, IHG, Marriott, and Red Roof.
