Broadcasting System	Digital	ATSC, Clear QAM
	Analog	NTSC
VESA		65" / 55": 300 x 300 50" / 43": 200 x 200

Pro:Centric Smart Platform

LG's Pro:Centric Smart HTML global platform hosts system integrator partners' in-room entertainment applications with proven backward compatibility across multiple generations of webOS smart TVs. It offers one of the widest possible choices of interactive systems to our hospitality customers. Through the Pro:Centric middleware API and chromium browser, partner applications can control all aspects of the LG smart television to provide a completely unique, customizable branded user experience for hotel guests encompassing entertainment, interactive features, streaming services and digital compendiums.

Pro:Centric Direct Hotel Management Solution from LG

The Pro:Centric Direct hotel content management solution offers simple editing tools, making it easy to perform service and IP network-based remote management with a single click. Pro:Centric Direct enables users to customize their interface easily and efficiently manage all TVs in the facility. The most recent version* provides IoT-based in-room control as well as voice control through LG Natural Language Processing.

* Some features may not be supported based on PCD versions.

Pro:Idiom

DRM (digital rights management) technology unlocks access to premium content to help assure rapid and broad deployment of HDTV and other high-value digital content. DRM technology also prevents any illegal copying of content.

Slim Depth for a Sleek Look

With a slim design, the UM670H series integrates smoothly with interiors, delivering a modern impression to your guests.

Multi-code IR

Multi-code IR* function eliminates any remote-control signal interaction between multiple TVs in one place. LG hospital TV supports this when used with the Multi-code IR remote control, so users can freely control their own TVs without disturbing the others.

* Multi-code IR remote control is not provided by LG. (sold separately)

SoftAP

Software-enabled Access Point* (SoftAP) is a virtual Wi-Fi feature that uses TV as a wireless hotspot, enabling guests to connect their own devices to the SoftAP.

* Screen Share may not be operated at the same time.

Kensington Lock Slot

Reinforced Metal Stand

Lock Down Plate with Credenza Aperture

Physical Security Features (55", 50" and 43" only)

Select LG Hotel TVs are protected by the reliable Kensington Lock solution (lock sold separately). They also come with a metal-reinforced stand to improve sturdiness, durability and safety. Finally these models include a lock-down plate with credenza aperture to lock the TV firmly to the credenza for added security.

* Magic Motion Remote is required (sold separately)
