

WorldVue Selected to Deliver Technology Solution for The Historian Hotel

WorldVue is proud to support the development of The Historian Hotel, a new Tribute Portfolio hotel opening in downtown Madison, Wisconsin.

Set within the historic Churchill Building, The Historian Hotel will bring new life to one of Madison's most recognizable landmarks. The 111-year-old building was Madison's first skyscraper and stands directly across from the Wisconsin State Capitol.

Scheduled to open in early 2027, the 81-room hotel will combine historic character with a modern hospitality experience. Each floor will also celebrate the people and groups that helped shape Madison's history.

To support that experience, WorldVue was selected to provide a comprehensive technology solution throughout the property.

A Complete Technology Foundation for a Historic Hotel

WorldVue will provide:

- Guest Property Network Service (GPNS)
- TV Programming
- Phone Service
- Guest Room Entertainment (GRE)

WorldVue will also integrate LG Smart TVs into the solution.

Together, these services will provide the technology foundation for a connected and seamless guest experience.

"We're looking forward to supporting First Hospitality and helping bring a seamless guest technology experience to such a unique and historic property," said Michael Tarakji, Strategic Accounts Director at WorldVue.

The Historian Hotel represents an exciting opportunity to support a property with a strong sense of place and history. As the building enters its next chapter, WorldVue looks forward to helping provide the technology services behind the guest experience.

Opening in 2027, The Historian Hotel will offer a new way to experience one of Madison's most historic landmarks. WorldVue is proud to support this project.

Building the Technology Behind Every Experience

From historic renovations to new developments, every property has its own technology requirements. WorldVue works with hotel owners, operators, and developers to deliver integrated solutions that support reliable connectivity, entertainment, communications, and the guest experience.
